Kacper Dominiak  
Intel, GPU Software Development Engineer (ML/CV)  
kacper.dominiak@intel.com

To Whom It May Concern,

I am pleased to provide this letter of recommendation for Lukasz Michalski based on his time at Intel as a GPU Software Developer Intern (ML/CV). He demonstrated remarkable technical proficiency and problem-solving abilities that significantly contributed to the development of AI/CV systems for visual corruption detection in video streams.

Lukasz was instrumental in advancing our methodologies for detecting rendering artifacts. He contributed effectively to optimizing the infrastructure and developing algorithms for AI/CV-based visual corruption detection. Additionally, he played a key role in developing anomaly detection systems for large-scale graphics driver execution, showcasing his strong understanding of machine learning.

Beyond his technical contributions, Mr. Michalski demonstrated excellent communication skills by sharing his knowledge with colleagues and delivering insightful presentations on his work. His enthusiasm for AI-driven solutions and passion for innovation were evident in every aspect of his work. He quickly grasped complex concepts, applied creative solutions, and collaborated effectively within multidisciplinary teams.

Mr. Michalski's proactive approach to challenges and commitment to excellence made him an invaluable asset to our team. He takes initiative, works independently when needed, and thrives in a team environment. I have no doubt that he will continue to excel in any future endeavors.

I strongly recommend Lukasz for any position that leverages his AI, computer vision, and software development expertise. He will undoubtedly be a valuable addition to any team.

Sincerely,

Kacper Dominiak
